

WHAT IS CLAIMED IS:

1. An antistatic structure of a fuel pipe, comprising:  
the fuel pipe to be charged in contact with a fuel;  
a pipe connected electrically to a vehicle body; and  
a conductive clamp coupling the fuel pipe with the pipe.

2. The antistatic structure of a fuel pipe according to claim 1, wherein the conductive clamp couples portions of the fuel pipe and the pipe that are disposed close to each other in parallel.

3. The antistatic structure of a fuel pipe according to claim 1, wherein the pipe is a brake pipe, and the brake pipe is electrically connected to the vehicle body through a bracket for supporting a connecting portion to a brake hose.

4. The antistatic structure of a fuel pipe according to claim 1, wherein the conductive clamp is constituted by a synthetic resin including carbon black.
